

## **2011 NASA GARDEN CLUB**

### **Membership Application**

Welcome to the Langley Garden Club! We hope that you enjoy your participation in the club, and that you have a rewarding gardening season. The club's garden area is divided into 52 plots, each plot measuring approximately 20 feet by 50 feet. The club provides tillers and equipment, which is kept in a shed next to the gardening area. The club also mows, plows and tills each seasonal plot once each Spring. At-site water is furnished by the center.

Members are responsible for the care and user maintenance of the equipment, as well as for providing their own hoses, sprinklers, stakes, etc.

New this year, we are committed to reducing our annual water usage. This is a center-wide mandate. To do this, we will be self-monitoring our water use and if it exceeds a pre-determined level will have to shut off the water to all plots for periods of time. More on this will be sent out as these rules are being developed. In planning your 2011 garden, please try to use water conservation principles (mulch, drippers, directed watering, rain monitoring....).

With heightened security all clubs have been asked to submit an after-hours list for our activities. This is particularly tricky for the Garden Club because we do not have any single events but that the members come and go individually all season long. I have included a new section in the membership application form to include the full names of anyone who will be working with you on your plots. This could include full-time badged employees, family members or anyone else who has access to the center and who will be coming and going after hours, including weekends, to work on your plot. You can email me anytime to add or subtract from that list.

Garden Club dues have been set at \$20 per plot (2 plots limit).

Please provide the information requested in the attached forms (Membership, Liability Waiver and Statement of Eligibility) together with your check or money order (made payable to Langley Garden Club).
